## Gibbons African Light Designs

Interior lighting solutions

# Who We Are?

Thank you for your time. We are a local South-African manufacturer of indoor lighting products that began in 2020. We are situated in the North-West province. Our entire product line is handcrafted using local, sustainable resources.

Our free standing and hanging designs on offer are contained in this offer.

Due to the uniqueness of each of the products we manufacturer, majority of the designs in this proposal or our rates brochure can be seen as examples of each design range, an exact example of the design will be communicated before any transaction is finalized.

We value your business, and we welcome any questions or suggestions.

## Owners and Management?

My name is Charles-Michael Gibbons.

I trust you will find my selection of African lighting solution pleasing and functional. I am the sole business owner with a bachelors of commerce in economic sciences from NWU.

Wood used is from the snags of Shepard or Camel Thorn trees found in abundance in the area, these have the ideal contours I want, and I feel I am giving the dead trees a second life especially with the standing tree designs incorporating the beauty of nature into most interior decor.

Our region has little to none insects that can be seen as pests that would live in the snags I use, so my business will not contribute in spreading any unwanted pests or alike.

A lot of time and care goes into creating my lighting fixtures so I do mostly work on per-order. Clients are welcome to suggest a design that best fit their needs.

My Designs is a long term investment that will stand the test of time.
